

Here is a summary of what the tabs at the top of our web page mean.

1. **New Games:** You can now view the monthly new game flyers on our website. Just click on new games and then click on the image of the game you would like to see.
2. **No Bottoms:** View a listing of our current no bottom games (\$50 winners and higher).
3. **Inventory:** Click on the inventory tab to view what we have in stock at that moment. This is how to read our inventory list. It's actually very easy to understand.

Sample below:

| Ticket | Cost | Mfr | Part Number | Name | Plays | Net | Pay | Winners/top | Notes |
|---------------|-------------|------------|--------------------|-------------|--------------|------------|------------|-----------------------|--------------|
| \$1 | | IG | 1507 | King Banana | 3136 | 773.00 | 75.35% | 3@205 | 252/1 18 |

The 1st Column is TICKET COST (ex: .25 cent, .50 cent, \$1, \$2, \$3, \$4 and \$5 games).

The 2nd Column is MFR stands for the manufacturer.

The 3rd Column is PART # or form number of the game.

The 4th Column is NAME of the game.

The 5th Column is PLAYS (ticket count) of the game.

The 6th Column is NET or profit on the game.

The 7th Column is PAY the percentage % of payback of the game.

The 8th Column is WINNERS / TOP what the game has for top winners (example: If a game has 3 winners at \$205 it will say 2 @ 205.)

The last Column NOTES stands for what the game has for bottom tier winners. (example: \$1 or \$2 playbacks. If it has \$2 replays on the bottom it will say something like 189/2, meaning there are 189-\$2 winning tickets in the game. If it has \$1 replays on the bottom it will say something like 252/1, meaning there are 252-\$1 winning tickets in the game. The last # in that column is the # of postable winners in that game, so if it says 18 it means there are 18 postable winners above \$50.

If it's on the inventory list we have at least one game in stock.
