

Great News!!!

Pulltabs Plus is carrying a new
Digital Counterfeit Money Detector

←
Every site needs one.

Scans money as fast as your sellers can feed the money into the unit. Unit will accept all denominations. Dollar bills can be fed into the unit in any direction (face down, face up, it doesn't matter). If anything is wrong with a bill, it will spit it back to you and provide you an audible beep and visual red light alerting you to inspect that dollar bill more closely.

In stock

Call for Pricing
